NDAP AB

Building the infrastructure for regulated Digital Assets

Confidential - For Qualified Investors Only

The Opportunity

A Fragmented Digital Asset Landscape

Fragmented Access

Token ecosystems, asset tokenization, and trading infrastructure are siloed. Real-world assets worth trillions remain untokenized. No listed Nordic vehicle offers exposure to the full digital asset stack.

Underserved Markets

Pakistan - 253M population, ~40M crypto users, 100M+ unbanked or underbanked. The bridge between cash and digital dollars doesn't exist yet. RWA tokenization projected to reach $16 trillion by 2030 (BCG & ADDX). The institutional wave has started.

The Solution

Three Layers Under One Swedish-Listed Entity

Market Infrastructure

Nayapaisa - regulated digital asset exchange for Pakistan. 50/50 JV with NBX (Euronext Growth Oslo). Among the first to pursue a full PVARA license. Revenue from trading commissions and listing fees.

Asset Infrastructure

ShippingX - fractional maritime investment through tokenization. Global fleet valued at $1.5T+ (Clarksons Research). Revenue from platform fees and issuances.

Engagement Infrastructure

Venturetoken - digital engagement ecosystem notified MiCA framework. Live on NBX, 100M fixed supply on Polygon. Proof-of-Engagement model powering participation across NDAP.

Why Now

Regulatory Tailwinds and Market Timing

Pakistan Is Opening

PVARA signed into law Q1 2026. Sandbox now open — first-wave applicants define the framework; everyone after complies with it. We are among the earliest, pursuing licenses for exchange, tokenization, and consumer rails.

MiCA Is Live in Europe

MiCA is live. Compliant operators now have a moat - non-compliant ones are being shut out. First movers are locking in positions across the EU. RWA tokenization projected to reach $16T by 2030 (BCG & ADDX).

Nayapaisa Overview

50/50 JV with NBX (Euronext Growth Oslo) — LOI Signed March 2026

Pakistan Market

253M population - 64% under 30, ~40M crypto users, 54% smartphone adoption. Among the first to pursue a full PVARA license - no competitor currently holds one.

First-Mover Advantage

NBX contributes proven exchange technology; NDAP leads local operations. Revenue from trading commissions and listing fees. Early market entry in the world's 3rd largest crypto market.

ShippingX & Venturetoken

Fractional Maritime Tokenization and MiCA Framework

ShippingX

Fractional maritime investment through tokenization. Global shipping fleet valued at $1.5T+ (Clarksons Research) - largely illiquid and inaccessible. Regulatory approvals secured Q2 2026.

Venturetoken

Digital engagement ecosystem under European MiCA framework. Live on NBX, 100M fixed supply on Polygon. Proof-of-Engagement model powering participation across NDAP. Revenue from ecosystem transaction fees and engagement services.

Traction and Milestones

SX Initial Investment

Q4 2024 - Maritime shipping fund owners, co-investment partnership established.

Venturetoken on NBX

Q4 2025 - Launched on NBX, MiCA-registered. Norway's first registered crypto asset.

PVARA Signed Into Law

Q1 2026 - Pakistan's regulatory framework for digital assets signed into law. ShippingX regulatory approvals also secured Q2 2026.

Nayapaisa JV with NBX

Q1 2026 - LOI signed.
Next: entity registration Q3 2026,
VASP license H1 2027,
NDAP listing H2 2027.

Business Model

Building Companies In-House, Taking Strategic Positions Over Time

Venture Builder

NDAP builds companies in-house, leverages shared infrastructure, and takes selective strategic positions over time. The current portfolio represents the first generation - not the last.

Shared Infrastructure

Each new initiative benefits from group-level regulatory expertise, cross-border capabilities, and proven technology partnerships. Lower cost, faster launch, compounding advantage.

Platform Premium

One user, acquired once — verified once, served across trading, real-world assets, and engagement. Each layer compounds on the last. Investors gain exposure to a pipeline engine with embedded capacity to launch new ventures — supporting valuation beyond sum-of-the-parts.

Corporate Structure

Naya Paisa - 50%

ShippingX - 25%

Venturetoken - 100%

NDAP combines a first-generation portfolio with shared infrastructure and venture-building capacity, supporting a platform premium beyond sum-of-the-parts.

Aprikos Venture AS

Jamil Rehman — Founder & Chairman

Former Head of Finance and specialist advisor in economics. One of Norway's earliest tokenization pioneers. Founded Aprikos Venture in 2019. Led the launch of Venturetoken and negotiated the Nayapaisa JV with NBX.

Sara Rana - Co-Founder & CMO

MSc Computer Science. Leads brand strategy, product development, and ecosystem growth across the NDAP portfolio.

Robert Lyngmoe - Finance & Operations

Business Administration (Siviløkonom) from Canada. Financial planning, operational scaling, and commercial partnerships at Aprikos.

The Ask

The Ask
30 MNOK pre-IPO round to execute on current assets - and fund the shared infrastructure that makes each future venture cheaper and faster to launch
.
Investor rationale
A first-mover opportunity to back a Nordic digital asset infrastructure group with clear execution focus today and platform potential over time.
